Budapest, 2018-2022

Degree: Computer Science

Specialization: Software Engineering

Bachelor of Science

Grade: 4

Languages

English: B2 level exam (unofficial
C1 current level)

German: unofficial A2 level

ABOUT ME

I am a 24-year-old, recent graduate developer with a **passion** for the broad knowledge I gained at university. I specialize in **web development**, particularly in **front-end** languages such as **ReactJs**, Angular, and NextJs. I am not afraid to participate in **back-end** or **full-stack** projects either.

I value **high-quality design** and I am a **perfectionist** in this regard; I do not settle for less.

Many people say that **creativity**, **precision**, and uniqueness characterize my life, and I enjoy exploring less conventional styles.

I love **nature** and have a strong appreciation for it; when time permits, I enjoy hiking and cycling in the hills of Buda. I enjoy being part of **communities** and belonging somewhere.

I am open to new things, new adventures, and **learning new skills!**

EXPERIENCE

NOVIN BT.

Junior back-end developer / 2022-2023

- Writing in Symfony PHP framework
- Git, Docker
- Creating new and modifying old REST API
- Database design, administration (MySQL, Doctrine)

UNIVERSITY

- Attending front-end, back-end, and full-stack courses.
- 2 years of experience in ReactJS developing.
- My thesis project: Multiplayer online board game
 - ReactJs front-end, NestJs back-end, SocketIO
 - SQLite database

SKILLS

ReactJs / NextJs (+ Redux)

NestJs

PHP

Angular
